• Annual point-to-point indexed account linked to the S&P 500

A. Indexed Accounts

Monthly Additive (Point-to-Point) Indexed Account with Annual Reset linked to the S&P 500

- Issued with a monthly cap that is guaranteed for one year
- The interest rate for the contract year can never be less than zero
- Cap may change at contract anniversary. Cap can never be less than .5%.
- Interest is calculated by comparing the index value at the start of the month to the index value at the end of the month. This value is then compared to the monthly cap rate, if applicable, and the resulting value becomes the monthly index interest rate. The monthly index rate for all 12 months are added together to determine the interest rate that will be credited on the last day of the contract year.

Annual Point-to-Point Indexed Account with Annual Reset linked to the S&P 500

- Issued with an annual cap that is guaranteed for one year
- The interest rate for the contract year may not be less than zero
- Cap may change at contract anniversary. Cap can never be less than 1%
- Interest is calculated by comparing the index value at the start of the contract year to the index value at the end of the contract year

B. Fixed Account (5 Year Guarantee)

- The annuity provides a competitive interest rate guaranteed for 5 years
- After the 5th contract year, the rate is subject to change, but is guaranteed to be at least 1%

The Benefit Base is the amount used to calculate Rider benefits. The Benefit Base is the initial premium payment plus the annual Rollup rate minus withdrawals and cannot be withdrawn in a lump sum.

Annual Rollup Rate - The Benefit Base grows annually with simple interest rollups until the earlier of age 85 or the election of benefits.

- Contract Anniversaries 1 – 10: 7% of premium minus cumulative withdrawals
- Contract Anniversaries 11+: 5% of premium minus cumulative withdrawals

Overview of Enhanced Benefits Rider Benefits

This rider provides guaranteed income, confinement, terminal illness and death benefits.*

1. Lifetime Withdrawals

On the date the lifetime withdrawal benefits begin, the withdrawal amount is equal to the Benefit Base multiplied by the payout percentage. Lifetime withdrawals are available after the first contract year. The payout percentage is determined when the lifetime withdrawal benefit is elected and is based on the age (youngest if joint) on that date. Once the lifetime withdrawals have started, the payout percentage may not be changed. There are several options available:

Single or Joint Payout

- Level or
- Increasing Lifetime Income Benefit

If the Increasing Payout Option is elected, the Lifetime Withdrawal amount will be increased by 3% annually until the Benefit Base is depleted. Increases are discontinued when enhanced withdrawals, terminal illness or confinement benefits are paid.

Lifetime Withdrawal Percentage

The Lifetime Withdrawal Percentage (LWP) is used in the calculation of the Lifetime Withdrawal Amount. The LWP is determined by the Attained Age of the Annuitant at the time of the first Withdrawal under this Rider. Once it is determined on the first day of the Withdrawal Phase, the LWP will not change.

Attained Age	Single Life		Joint Life	
	Level Payout	Increasing Payout	Level Payout	Increasing Payout
50-54	3.0%	2.0%	2.5%	1.5%
55-59	3.5%	2.5%	3.0%	2.0%
60-64	4.0%	3.0%	3.5%	2.5%
65-69	4.5%	3.5%	4.0%	3.0%
70-74	5.0%	4.0%	4.5%	3.5%
75-79	5.5%	4.5%	5.0%	4.0%
80-84	6.0%	5.0%	5.5%	4.5%
85-89	6.5%	5.5%	6.0%	5.0%
90+	7.0%	6.0%	6.5%	5.5%

Early Income Bonus

An additional benefit is the Early Income Bonus. If lifetime withdrawals start prior to the eighth contract anniversary, Athene Annuity will increase the lifetime withdrawal according to the schedule below:
